

BENJAMIN HOROWITZ

ben.horowitz@ipmu.jp
<https://bhorowitz.github.io>

Research Interests

Novel Astrophysical Simulation/Inference Methods and Machine Learning

The Cosmic Web and Galaxy-Halo/Environment Connection

Intergalactic and Intracluster Medium Physics

Education

University of California, Berkeley — Berkeley, CA

Fall 2014–Spring 2020

MA, Physics (2015), Ph.D. (2020)

Thesis: *Optimal Reconstruction of Cosmological Density Fields* (Advisor: Prof. Uros Seljak)

NSF Graduate Research Fellowship (2014-2018)

DOE Science Graduate Student Research Award (2019-2020)

Yale University — New Haven, CT

Fall 2010 – Spring 2014

B.S. in Mathematics and Physics

NASA Connecticut Space Grant Consortium Fellowship (2012)

Academic Appointments

Kavli Institute for the Physics and Mathematics of the Universe — Kashiwanoha, JP

Spring 2024 – Present

Kavli IPMU Fellow (2024 - present)

Working on machine learning-based approaches connecting large scale structure and hydrodynamics.

Lawrence Berkeley National Lab — Berkeley, CA

Spring 2023 – Fall 2023

Postdoctoral Research Associate focused on intersection of machine learning and astrophysical analysis.

Princeton Astrophysical Sciences — Princeton, NJ

Spring 2020 – Winter 2022

Postdoctoral Research Associate focused on statistical analysis and machine learning of large survey data.

Lawrence Berkeley National Lab — Berkeley, CA

Spring 2019 – Fall 2019

Graduate Student Research Associate

Kavli Institute for the Physics and Mathematics of the Universe — Kashiwanoha, JP

Fall 2018

NSF-JSPS Graduate Research Opportunities Worldwide Research Fellowship

Hosted by Prof. Khee Gan Lee and Prof. Masahiro Takada

Princeton Plasma Physics Lab — Princeton, NJ

Summer 2013

Developed efficient algorithms in Python and C++ for calculation of Thomson scattering spectrum and fitting routines for ongoing fusion experiments.

Student Projects Advised

Qi Guo (University of Tokyo Graduate Student, Spring 2024 – Current):

Constraints on Baryon Feedback from the 3d Ly- α forest power spectra (w/ Prof. Khee-Gan Lee)

Lucas Mebille (École Polytechnique France Graduate Student, Summer 2025 – Present):
Extracting Information from Halo Formation

Omar Yehia (University of Tokyo Graduate Student, Summer 2024 – Summer 2025):

Diffusion Models for Baryon Painting

Jupiter Ding (Princeton University Undergraduate, Summer 2021 – Summer 2022):

Differentiable Analysis of Ly- α Hydrodynamical Simulations

Adam Rebei (Princeton University Undergraduate, Summer 2019):
Optimal Power Spectrum Estimation from Lyman Alpha Tomography

Yi Kang (Tsinghua University Undergraduate, Summer 2019 – Fall 2020):
Machine learning approach to predicted Lyman Alpha Forest Flux (w/ Dr. Yin Li, Prof. Khee-Gan Lee)

Zihao Li (Sichuan University Undergraduate, Summer 2019 – Summer 2021):
Optimal Void Reconstruction from Next Generation Spectroscopic Observations (w/ Prof. Zheng Cai)

Nishant Misra (UC Berkeley Undergraduate, Summer 2019 – Fall 2021):
Gaussianization of the Lyman Alpha Forest (w/ Prof. Uros Seljak)

Max Dornfest (UC Berkeley Undergraduate, Spring 2019 – Spring 2020):
Surrogate Models for Ly α Forest

Benjamin Zhang (UC Berkeley Undergraduate, Spring 2019 – Spring 2021):
Accurate Wiener Filtering from Lyman Alpha Tomography

Teaching Experience

Course	Institution	Role	Semester
Scientific Programming with Python	UC Berkeley	Instructor	Summer 2019
Cosmology and Relativistic Astrophysics	UC Berkeley	TA	Spring 2018
Physics for Future Presidents	UC Berkeley	TA	Fall 2018
Introduction to Cosmology	Stanford	Instructor	Summer 2016
Electricity and Magnetism	UC Berkeley	TA	Spring 2015
History of Mathematics	Yale	TA	Fall 2013
Calculus I	Yale	TA	Spring 2013

Service

Referee: Monthly Notices of The Royal Astronomy Society, Astrophysical Journal, Journal of Cosmology and Astroparticle Physics, Journal of Computational Mathematics

IPMU Astronomy Seminar Organizer — Kashiwanoha, JP *Fall 2024 – Present*

Center for Data Driven Discovery Group Meeting Leader — Kashiwanoha, JP *Fall 2025 – Present*

Learning Unlimited — Cambridge, MA *Spring 2013 – Present*

Executive Director (2015-2023), Director of Development (2013-2015)

Led volunteer organization to spread and support student-run educational enrichment programs ("Splash") to various colleges and universities around the United States. Programs reach over 12,000 secondary school students annually in twelve states.

Splash — Various *Fall 2010 – Present*

Taught over 100 hours of educational outreach courses at Splash programs at Yale, MIT, Bard College, UC Berkeley, and Stanford. Topics taught include Physics of Black Holes, Introduction to Cosmology, Themes of Modern Physics, and Partial Differential Equations.

Splash at Yale — New Haven, CT *Spring 2011 – 2019*

Executive Director (2011-2013), Board Member (2014 - 2019)

Cofounded educational outreach organization, registered as a 501(c)(3). Program reaches approximately 2,000 students annually.

Observing Proposals

Co-I on successful Subaru proposal S25A0117N for Spectroscopy of QAsars in Subaru Hexagons (SQUASH)

Co-I on successful ALMA proposals 2025.1.01243.S, 2025.1.01615.S for Cosmic Himalayas

Co-I on successful UC-Keck proposals 2018B_U095, 2019A_U052, 2019B_U180 for CLAMATO DR2

Affiliations

Center for Data-Driven Discovery, University of Tokyo
 Lawrence Berkeley National Lab, Center for Computational Cosmology
 Prime Focus Spectrograph (PFS)
 – Galaxy Evolution - Large Scale Structure Coordinator
 COSMOS Lyman-Alpha Mapping And Tomographic Observations (CLAMATO)
 Large Synoptic Survey Telescope - Dark Energy Science Collaboration (LSST-DESC)

Selected Recent Talks

Artificial Intelligence and High Energy Physics (AI+HEP) in East Asia (Invited) — Tsukuba, JP	1/2026
MockNYC 2026: Improving Galaxy Modeling for Cosmological Inference (Invited) — NYC, New York	1/2026
ASIAA workshop: Reconstructing the Universe — Taipei, Taiwan	12/2025
Putting the Cosmic Large-scale Structure on the Map (Invited) — Vienna, Austria	9/2025
New Strategies for Extracting Cosmology from Future Galaxy Surveys — Sexton, Italy	7/2025
ASIAA Colloquium (Invited) — Taipei, Taiwan	3/2025
Cosmology and galaxy astrophysics with simulations and machine learning — NYC, New York	12/2024
Yale Astrophysics Seminar — New Haven, CT	12/2024
Cosmology in the Adriatic – From PT to AI — Split, Croatia	7/2024
Baryons in the Universe — Kashiwanoha, Japan	4/2024
AI-driven discovery in physics and astrophysics — Kashiwanoha, Japan	1/2024
Future Science with CMB x LSS — Kyoto, Japan	4/2023
Nagoya Astronomy Colloquium (Invited) — Nagoya, Japan	4/2023
Vipolže Cosmology Conference 2022 — Smartno, Slovenia	7/2022
Cosmic Cartography 2022 (Invited) — Virtual	4/2022
CCA/NYU Cosmology X Machine learning Workshop — Virtual	9/2021
Dark Energy Spectroscopic Instrument Machine Learning Club — Virtual	6/2021
Bay Area Likelihood Free Inference Meeting — Berkeley Institute for Data Science, Berkeley, CA	12/2019
Thirty Meter Telescope Science Meeting 2019 — Xiamen University, Xiamen, China	11/2019
First Galaxies, First Structures — Paris Observatory, Paris, France	10/2019
Cosmic Web 2019 — Royal Observatory, Edinburgh, Scotland, UK	6/2019
COSMOS 2019 — Center for Computational Astrophysics, New York City, NY	5/2019
Interstellar Medium Program of Studies Seminar — UCSC, Santa Cruz, CA	5/2019
NYU-CCA Cosmology Seminar — New York City, NY	3/2019
Dark Universe Conference — Kyoto, Japan	2/2019
